

# Combi Clean CCAT5

## The "All Terrain" Combi-Compact

Just one look at the "All Terrain" models will tell you just how different they really are, bigger.....bolder and absolutely brilliant. Never before has a trolley unit had so many features designed to meet the needs of the professional.

The big wheel Structofoam chassis is a masterpiece allowing movement both inside and outside and even that has rotating buffers on every corner and its own brake system.

Two minutes to unfold and put it together, no tools required, superb strength, plenty of storage space and a choice of 120-litre or 2 x 70-litre (140-litre) waste systems. Twin 10-litre pails are standard.

Available with our AWS 2416 system (Automatic Water Separation) and a range of 5 mop specifications.

*Also available in stainless steel*

1 x 120L

2 x 70L

Shown with Kit JT2
