

Combi Compact NCC1

CombiCompact service system

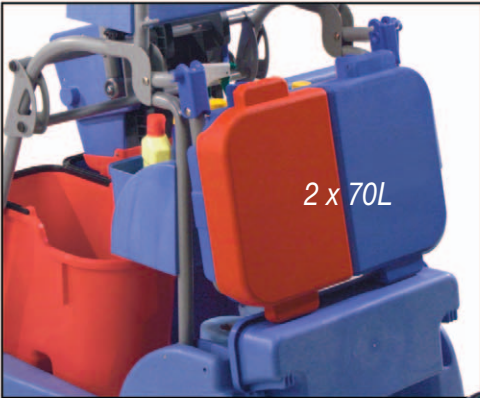

Not only our unique folding system with its exceptional strength and “no tools required” assembly but also a super compact design. Compact in use and even more compact in storage.

Plenty of tray and storage space, twin 6-litre pails, a choice of 120-litre single or 2 x 70-litre (140-litre) waste systems. The Combi-Compact is designed to be used with our unique 2416 mopping facility and its patented AWS (Automatic Water Separation) system.

To complement the 2416 there is a range of 5 mop specifications from which to choose.

All our mop systems work in conjunction with the high efficiency All-Mops Press.

Also available in stainless steel

Shown with Kit JT2
(See page 19)
